Harvest Date: Hunt Location State: Hunt Unit:

1) What species did you hunt?

2) What cartridge was the animal shot with? (Please be specific, write down the entire cartridge name. Example: .30-06 Springfield, .300 Winchester Magnum, 7mm-08 Remington, etc.)

3) What weight and model bullet are you using? (Be specific, grain weight and bullet model. Example: 150 grain Nosler Partition, 180 grain Remington Corelokt, 165 grain Barnes Tipped TSX, etc.)

4) What was the range (**in yards**) to the animal when first shot?

5) How did you measure the distances?

O Laser Range Finder O Paced it off O GPS O Other: _____

6) What was the behavior of the animal just before the first shot? (Select alertness level and animal activity)

O Relaxed, and ⇒ O Bedded
O Alert, and ⇒ O Feeding
O Startled, and ⇒ O Walking
O Running

7) How far did the animal travel (**in yards**) after impact by the first bullet? Be certain to track the path the animal ran, not the straight-line distance from where the first bullet hit to final recovery. Total distance covered while the animal ran is important to evaluate performance.

8) How did you measure the distances?

O Laser Range Finder O Paced it off O GPS O Other: _____

9) What is the sex of the animal?

O Male O Female

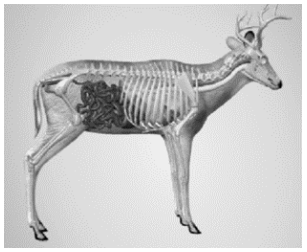
10) Was a killing shot required after finding the animal?

O Yes O No

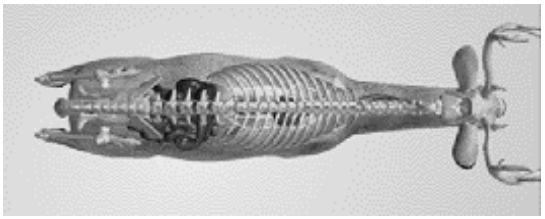
11) How many shots were taken and how many times did you hit the animal?

Shots Taken	**Hits on animal**
O One (1) time	O One (1) time
O Two (2) times	O Two (2) times
O Three (3) times	O Three (3) times
O Four (4) times	O Four (4) times
O Five (5) or more times How many:	O Five (5) or more times How many:

12) Mark on the diagram where the **first** bullet struck the animal:



13) For the first bullet: mark the entry point and the where the bullet stopped or exited on the diagram below:



14) How much did the animal weigh? Record the weight according to the process used (please use as close to whole animal weight as possible):

O Whole animal weight:	O Gutted animal weight:	O Quartered animal weight, bone in:	O Other: _____

15) Describe the shot, bullet impacts, and the animal's response in your own words
